Results 1 - 8 of 8 short listing

1 After Action Review System development trends 10%
Gerald Vasend
Proceedings of the 27th conference on Winter simulation December 1995

2 Combining training and customer documentation into modular, reusable information 9%
Mildred E. McGuire , Gregory D. Henderson , James M. Moran , Lee Anne Center , Lori Ely
Proceedings of the 16th annual international conference on Computer documentation September 1998

3 Book reviews 2%
intelligence September 2001
Volume 12 Issue 3

4 The most important issues in knowledge management 1%
William R. King , Peter V. Marks , Scott McCoy
Communications of the ACM September 2002
Volume 45 Issue 9
What can KM do for corporate memory, management thinking, and IS responsibility, as well as for overall business performance?

5 Collaborative modeling and negotiation 1%
Dhanesh Samarasan
Conference Sponsored by ACM SIGOIS and IEEECS TC-OA on Office information systems April 1988
New problems in negotiation call for a new framework of solutions. Negotiation management, one such framework, has at its heart the application of computer

models and related technology to a collaborative effort at dispute resolution. In this paradigm, negotiation is treated as a communicative and knowledge-intensive group problem-solving process. Easily accessible techniques are being developed for modeling both the process and substance of negotiation. In addition, tools are being designe ...

6 Workshop: Documenting software systems with views II: an integrated approach based on XML 1%

Jochen Hartmann , Shihong Huang , Scott Tilley
Proceedings of the 19th annual international conference on Computer documentation October 2001

Software engineers rely on program documentation as an aid in understanding the functional nature, high-level design, and implementation details of complex applications. Without such documentation, engineers are forced to rely solely on source code. This is a time-consuming and error-prone process, especially when one considers the amount of information assimilation and domain mapping that is required to understand the architecture of a large-scale software system. This paper describes an integr ...

7 Teaching 3D modeling and simulation: virtual kelp forest case study 0%

Don Brutzman
Proceeding of the seventh international conference on 3D Web technology February 2002

Two classes of graduate students learning 3D graphics and analytic simulation at the Naval Postgraduate School modeled the three_dimensional (3D) shape, structure, imagery and motion behaviors of plants and animals in the kelp forest exhibit at the Monterey Bay Aquarium. Our intended audience includes educators and students of all ages, scientific users interested in composing models in a 3D Web environment, and the general public. The Virtual Reality Modeling Language (VRML) proved to be an exc ...

8 Management support system effectiveness: further empirical evidence 0%

Guisseppi Forgionne , Rajiv Kohli
Journal of the AIS March 2000
